Dear Colleagues,

Interactions between basic and clinical researchers should be more like a 'virtuous cycle' of bench to bedside and back again. With the advances in genetic, molecular diagnostics and therapeutics, it is now essential for basic and clinical scientists to collaborate to improve patient outcomes by exploring disease mechanisms, therapeutic avenues and diagnostics.

With this background, Centre for Advanced Research and Excellence in Heart Failure (CARE-HF) established under the Indian Council of Medical Research (ICMR) at SCTIMST, Trivandrum, Kerala, India, is organizing a confluence of heart failure specialists and basic scientists. This meeting is organized in association with the Heart Failure Association of India, and is supported by the ICMR.
